

## Microfiber Cloth

### Description

Special cleaning cloth for removing contamination on virtually all surfaces. A streak-free and lint-free finish for smooth surfaces such as plastic, glass, stainless steel and sealed wood surfaces. A microfiber cloth plus water is all it takes to clean surfaces superbly. Also suitable for polishing paintwork care products when used dry. For cleaning, can be washed up to 95 °C without fabric softener.

### Properties

- can be washed at temperatures up to 95 °C
- outstanding absorption capacity
- excellent cleaning effect
- can be applied without scratching

### Technical data

Base	12 % Polyamid
size	400 x 400 mm

### Areas of application

For cleaning work in trade, industry and the household.

### Comment

Do not use fabric softener Do not put the cloth in the dryer Wash cloth separately

### Application

Clean the soiled surface with a moist microfiber cloth. Rinse out the microfiber cloth repeatedly in clear, warm water. For manual polishing of paintwork care products, use circular motions and light pressure to bring out the luster effect of the paint with the dry microfiber cloth.
